Protection always

#### PVC CLING FILM

The hectic pace of our modern lifestyle welcomes products that rate high on convenience and ease of usage. Health, hygiene, cleanliness and freshness are parameters that cannot be compromised at any cost. Everyday we fight pollution and harmful germs in our endeavour to maintain a healthy and energetic life. As our primary source of nourishment vegetables, fruits and cooked food items need to be consumed in their most edible state. **Wrap All** suits the needs of today and protects your food to maintain all the nourishment.

**Pragya Flexifilm Industries** manufactures PVC Cling Film under the brand **Wrap All**. The production equipment has been completely imported and the product adheres to the highest standards of food grade quality. Wrap All is available in wide range suited for hospitality, commercial, home and industrial applications.

**Wrap All** is well suited for all food items and industrial applications. The really transparent look and smooth feel of the film makes it almost invisible. This helps in maintaining the authentic look and texture of the food that is being covered. **Wrap All** is compatible in high and low temperatures. Hence it can be used to store food in refrigerators and heat food in microwave oven without changing food content and quality. For home usage like storage to commercial usage in hotels, hospitals, canteens, cafeterias, airlines. etc. **Wrap All** is an ideal wrapping option.
